PROFILE

Artificial Intelligence undergraduate at Xiamen University Malaysia seeking AI engineering or junior software development opportunities. Experience in machine learning, deep learning, and computer vision through coursework, with frontend and backend contributions across four team hackathons. Built Ledge, a Windows desktop notes application. Fluent in Mandarin, English, and Malay.

TECHNICAL SKILLS

Programming: Python, C, C++, Kotlin; C# and TypeScript used in projects.

AI and data: PyTorch, Scikit-learn, NLP, computer vision, Pandas, NumPy, Matplotlib, Weka.

Application development: React, Next.js, Node.js/Express, Jetpack Compose, Room, Hilt, WPF/.NET 8, Streamlit, Supabase.

Tools: Git, Excel, Adobe Premiere Pro, Adobe After Effects.

PERSONAL PROJECT

Ledge | Windows desktop application

C# / WPF / .NET 8 / Win32 | github.com/chuakhaiyi/Ledge

Built a Windows sticky-note application with edge docking, hover previews, floating notes, and keyboard shortcuts. Supports local JSON storage, pinning, archiving, and portable use without a cloud account.

TEAM HACKATHONS

Suiroll | MUBA Hackathon

6 September 2026 pitch | Four-person team | Participant

Responsible for frontend UI during a one-week build of a blockchain contractor payroll workspace. Worked on connecting the frontend and backend. The team prototype combines AI-assisted spreadsheet imports, human approval, and USDC payments on Sui testnet. Stack: React, TypeScript, Tailwind CSS, Supabase, and Sui.

github.com/DayDreamingLab/suirollpay

MediSync+ | UMHackathon

May 2026 | Finalist, 11th place | Four-person team

Led UI development and bug fixes for an AI-powered post-discharge companion built with Kotlin, Jetpack Compose, Room, and Hilt. The team implemented a five-agent system for medication tracking, symptom triage, and risk prediction.

github.com/chuakhaiyi/MediSyncPlus-Finalist-

NextChapter | USAII Hackathon

June 2026 | Four-person team

Contributed UI fixes and backend development to a Malaysia-focused agentic AI career pathway planner using TypeScript, Next.js, and Supabase. The project generates RM-based pathway flowcharts with feasibility scoring.

Intelligent CPD | Imagine Hackathon, Taylor's University

June 2026 | Team project

Built UI and backend features for advisor and admin dashboards in an AI-powered professional development platform. The team used React, Node.js/Express, and Supabase to connect client needs and advisor skill gaps to learning paths.

Louis Chua Khai Yi

Education, experience and coursework

EDUCATION

Bachelor of Engineering in Artificial Intelligence

Xiamen University Malaysia | September 2024 - Present

Coursework includes machine learning, deep learning, computer vision, and AI algorithms.

Foundation in Science

Xiamen University Malaysia | August 2023 - August 2024

CGPA: 3.72/4.00

Sijil Pelajaran Malaysia (SPM)

SMK Tun Fatimah Hashim | January 2018 - March 2023

Results: 3A+, 1A, 3A-, 2B+

EXPERIENCE

Student Ambassador | Student Recruitment Office

Xiamen University Malaysia | September 2024 - Present

Maintained records for 40+ prospective student inquiries and supported recruitment events, ensuring timely communication with applicants and parents.

Waiter

Cathay Restaurant Eco Spring | September 2019 - October 2020

Served 30+ customers per shift in a fast-paced dining environment, coordinating orders and kitchen communication.

UNIVERSITY INVOLVEMENT

General Affairs | Artificial Intelligence Club

Xiamen University Malaysia | October 2025 - Present

Coordinated logistics and materials preparation for 10+ club activities and events.

Action Team, General Affairs | Orientation

Xiamen University Malaysia | December 2025

Managed crowd flow and logistics for orientation events supporting 100+ incoming students.

SELECTED COURSEWORK

Music genre classification: Built PyTorch CNN and CNN+LSTM models with SpecAugment preprocessing, plus a Streamlit dashboard for model evaluation and comparison.

NLP chatbot: Designed a Python chatbot and trained and optimized machine learning models for the target dataset.

AI travel planner: Built a Streamlit application using the Hugging Face inference API for personalized travel recommendations.

AI and computer vision: Implemented informed and uninformed search, simulated annealing, image transforms, stereo vision, and connected-component labelling.

LANGUAGES AND STRENGTHS

Languages: Mandarin Chinese, English, Malay.

Strengths: Problem-solving, time management, communication, teamwork, and adaptability.
